WT Docket No. 11-65

June 16, 2011

Dear Chairman Genachowski and Commissioners:

As a citizen of Oconee County and the executive director of our community's Chamber of Commerce, I want to see the AT&T and T-Mobile merger go through because (1) it will extend 4G LTE access to 55 million additional Americans beyond what AT&T originally planned, (2) it will likely lead to lower wireless prices (as has happened following previous mergers in the past 10 years), (3) it will provide a fast, efficient solution to the impending spectrum crunch, (4) and it will allow for \$8 billion of additional investment, much of which will occur in small towns and rural communities.

Taken in combination, these benefits will lead to a more vibrant and productive society where customers and businesses will have the opportunity to take advantage of the vast array of applications that will help improve their quality of life. From distance learning to telemedicine, 4G LTE wireless service will enable customers and businesses to take full advantage of the many benefits state of the art, advanced wireless broadband networks provide.

As a consumer, I would like to urge the Federal Communications Commission to see to it that this merger goes through so that myself and fellow wireless customers can realize the full benefits of 4G LTE service. From my professional experience, I understand the importance of advance technology for business growth and success. That's why I believe this merger will be good for our state's economic climate as a whole and will help encourage job creation.

Thank you for your time and careful consideration.

Sincerely,

Sandra C. Jones
